

Kern Worktable

for vertical stacker and modules

kernMail

The worktable has been specially designed for the Kern 3500 and Kern 3600 Inserting Systems to expand the functionalities.

Many good ideas come from practice and in the daily use of the systems. This is also how the concept for the new worktable for the vertical stacker was created.

This practical worktable module can be added to the Kern 3500 and Kern 3600 Inserting Systems in the output area.

Adjustments, retooling and troubleshooting are considerably simplified, as material deposited on the cover of the vertical stacker no longer needs to be removed individually.

The worktable plate is simply moved to the rear and access to the vertical stacker is provided.

Since the worktable stands on fixable rollers, it can be pushed to the side without any problems.

There are no restrictions in the operation of the vertical stacker.

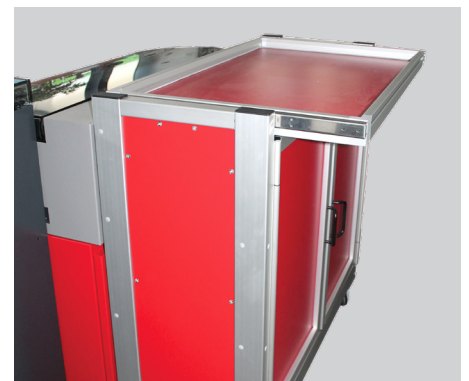

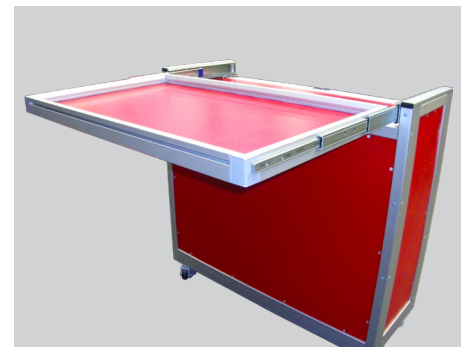

By all means, it can also be used for other modules (ZS, KV, input modules).

Our Services

- Personal consultancy on-site
- Requirement analysis, and solution proposal according to customer needs
- Installation by Kern AG
- System integration
- On-site training of your employees
- Reliable support and maintenance during operation
- Customer-oriented service models

Features

- Height: 1125 mm
- Width: 1180 mm
- Length: 450 – 650 mm
- Simple operation
- Individually configurable
- 4 rolls for easy transport
