mailFactory PROStream

Introducing: mailFactory PROStream Quality Check on the Production

Kern mailFactory PROStream is a natural extension to the Kern mailFactory Suite of Automated Document Factory software tools, designed to help customers better manage their production resources.

PROStream for UNIX is a server based tool that accepts or extracts incoming print streams, parses the existing indexes, indexes, or re-indexes those streams, then allows a wide range of reporting and re-engineering to be performed on the streams prior to being put into production.

PROStream is extraordinarily efficient, processing most applications at over one million pages per hour and adding very little to the production time window.

mailFactory PROStream:

- Enables print stream re-engineering
- Strips and replaces OMR/Barcodes
- Indexes and creates control files
- Signals Automatic reprints

Kern mailFactory

Kern mailFactory is a suite of software products that compliment your production inserting systems and deliver end-to-end production controls from "data to door". Kern mailFactory, like Kern inserters, is modular, allowing you to choose the components you need today and add and scale your solution as your needs change.

mailFactory Components

- **mailFactory Manager** – Centralized control for your production operations
- **mailFactory FileManager** – extension to enable control file automation
- **mailFactory Document Control** – intelligent database driven inserting and integrity monitoring
- **mailFactory Reporter** – Powerful and flexible web-based, reporting
- **mailFactory Workplace** – Operator dashboard for mailpiece specific controls
- **mailFactory Validation** – camera based integrity validation
- **mailFactory Output Control** – output to post processing ink jet systems
- **mailFactory Postal Reporter** – Server-based address cleansing (CASS, postal presorting PAVE) and manifest preparation
- **mailFactory PROStream** – Server-based, advanced print stream reengineering enabling barcode changes, control file creation and more.
